

MATH 2320 – Fall 2011

Discrete Mathematics

Instructor

- Name: Dr. David Pike
- Office: Henrietta Harvey Building – Room 3021
- Phone: 864-8096
- Email: dapike@mun.ca
- Office Hours: 11–12 on Tuesday and Thursday, 2–3 on Friday, or by appointment

Course Info

- Location: Education Building – Room 3034B
- Class Times: 12–1 on Tuesday and Thursday, 1–2 on Friday
- Prerequisite: MATH 1001 or MATH 2050.
- Textbook: “Discrete Mathematics with Graph Theory” by Goodaire and Parmenter, third edition
- Webpage: somewhere at www.math.mun.ca/~dapike

Course Outline

- Chapter 0 Proofs
- Chapter 1 Logic
- Chapter 2 Sets and Relations
- Chapter 3 Functions
- Chapter 4 The Integers
- Chapter 5 Induction and Recursion
- Chapter 6 Principles of Counting
- Chapter 7 Permutations and Combinations

Method of Evaluation and Related Policies

- Assignments will be due at the time and date announced when distributed. Assignments should be submitted to the designated assignment box in the corridor near the Math & Stats General Office, located in the Henrietta Harvey Building. Late assignments will not normally be accepted and will receive a grade of zero.
- Plagiarism, cheating, and academic dishonesty will not be tolerated. The minimum penalty for any form of cheating on an assignment, test, etc. will be a grade of zero for the corresponding assignment, test, etc.
- It shouldn't need to be said, but inevitably somebody puts me through this test... on homework, quizzes, tests, etc, I expect you to show your work. Simply stating the answer (even if it is correct) will rarely get you full credit; the work behind your answer is usually given more credit than the answer itself. In short, your job is to *show* that you know *how* to do the exercises.

Likewise, your work should reflect clear content as well as coherent and organised structure. Part of what this means is that your work should be clear to follow and should show a

logical progression of thought. Arguments that wander around the point, or which include extraneous and/or irrelevant side details, are inferior to arguments that do not go astray at times. Likewise, if you have to guide me through your work in order to point out your thought process (again, even if you got the correct answer in the end), then you should not expect to get full credit.

- Be aware that not all learning takes place in the classroom. Expect to devote personal time to ensure that you fully comprehend and understand the material. This will likely entail reading from the textbook, consulting with additional resources, engaging in interactive discussions, as well as doing exercises beyond those which are assigned.

- Quizzes and/or tests will be regularly administered. Crib sheets will not be allowed.

Expect to have photo-id checked during each test and exam.

Make-up quizzes and tests will be given only for legitimate absences, and only if the request for a make-up is brought to my attention no later than the day that you next attend class; otherwise, a score of zero will be assigned for any missed quizzes and/or tests. I reserve the right to require documentation supporting the absence.

One of the tests will likely take place on November 4.

- The final exam will be comprehensive.
- Final course grades will be based upon the following scheme

Homework:	30
Quizzes and/or Tests:	30
Final Exam:	40
	<hr/>
	100

Notwithstanding the above formula, a combined score of at least 30 out of the 70 possible points must be achieved on the quizzes/tests and the final exam in order to pass the course.

- Requests for “extra-credit” projects will be denied. Put simply, your grade will be based upon the required course-work as indicated in this syllabus.

If You’re Thinking of Majoring in Math...

... but aren’t sure what career options would be available with a Math degree, then here are some resources that you can look at:

- “101 Careers in Mathematics” by Andrew Sterrett. Call Number: QA 10.5.A15 1996
- “She Does Math!” by Marla Parker. Call Number: QA 27.5.S53 1995
- www.ams.org/careers/
- www.maa.org/careers/
- www.cms.math.ca/Education/MathAtWork

If you want to talk to somebody for academic advice concerning undergraduate programmes of study in Mathematics, you can see Harold Johnson in the Henrietta Harvey Building, Room 3004.

Also, the Department of Mathematics and Statistics publishes an Undergraduate Guide to its courses and programmes of study. If you don’t already have one, pick one up from Harold Johnson.
