DEPARTMENT OF MATHEMATICS AND STATISTICS

ASSIGNMENT 5

MATHEMATICS 1000

FALL 2023

Due: Wednesday, October 30th, 2023 at 4:00pm. SHOW ALL WORK.

Note: You should complete the WebAssign problem sets “Derivatives of Algebraic Functions,” “Algebraic Products and Quotients,” “Derivatives of Trigonometric Functions” and “Trigonometric Products and Quotients”, as well as Worksheets 2.3, 2.4 and 3.1, before you work on this assignment. Beginning with this assignment, you may use the rules of differentiation rather than the limit definition of the derivative, unless otherwise noted.

1. Differentiate each of the following functions.

(a) $y = \frac{e^x}{\sin(x) - \pi^4}$

(b) $f(x) = \frac{\sin(x)}{\tan(x)}$

(c) $g(t) = \sqrt{t}e^t \cos(t)$

(d) $f(x) = \frac{x \cot(x)}{x^2 + 1}$

2. Find the equations of the tangent and normal lines to the curve

$$f(x) = \sec(x) \tan(x)$$

at $x = \frac{\pi}{3}$.
