

MATHEMATICS 1000 (Calculus I) — Fall 2024

Gradescope Information

For the submission of your weekly homework assignments, we will be using a service called Gradescope, which is accessible through the Brightspace course shell.

You can write your assignment on loose leaf paper, or create it digitally; that's up to you. There is no need to print or submit the assignment paper itself.

When you're ready to submit an assignment, follow these steps:

1. If you've written your assignment on paper, scan it as a single PDF file using a physical scanner or a scanning app — not as multiple PDF or graphics files. Likewise, if you've created your assignment digitally, export it as a single PDF file (with multiple pages, if necessary). Either way, make sure all writing is clearly legible.
2. Go to the Brightspace course shell, and click on "Gradescope" in the navigation bar. On the Gradescope screen which then appears, click on "Open in New Window".
3. From your Gradescope dashboard, click on the appropriate assignment. Select "Submit PDF", choose the file you want to upload, and click on "Upload PDF".
4. **IMPORTANT:** For each question on the assignment, follow the Gradescope prompts to indicate the page (or pages) where that question can be found. You must complete this step, even if your assignment consists of just a single page. No feedback will be provided on assignments for which the questions have not been associated with the relevant pages.

For a video walkthrough of these steps, please see <https://youtu.be/u-pK4GzpId0>.

Note that you can resubmit an assignment any number of times, prior to the indicated deadline.
