MATHEMATICS 1000 (Calculus I) — Fall 2017

WebAssign Information

An important part of your evaluation in Math 1000 will consist of a series of problem sets conducted via WebAssign, an online homework system. WebAssign gives you instant feedback on your work, enabling you to identify topics you may want to get extra help with (such as from your instructor or the Math Help Centre). WebAssign also provides various forms of additional help and practice, such as tutorial videos and supplementary exercises.

All the information you need to get started with WebAssign can be found on the Math Department’s website at

http://www.math.mun.ca/webassign/

This includes:

• How to set up your WebAssign account
• What you will need to buy in order to use WebAssign
• How you will be graded in WebAssign
• How you can get extra practice via WebAssign

Important Notes

• When you sign up for WebAssign, you must use your @mun.ca (or @grenfell.mun.ca or @mi.mun.ca) e-mail address, in accordance with Memorial University policy. You cannot use a personal e-mail address (like Hotmail or Gmail). Your MUN e-mail address can be set up through http://my.mun.ca.

• Your WebAssign account automatically gives you access to the e-book version of the Stewart 8th edition textbook.

• Compulsory problem sets are indicated by the symbol [!] in the title. You will also have access to a number of practice-only problem sets, indicated by the symbol [P]. These will not count towards your final grade, but you are strongly encouraged to complete them as part of your work in this course.

• A notification that a compulsory problem set has been posted will be sent to your MUN e-mail address. Your instructor will not necessarily announce a new problem set in class. It’s your responsibility to be aware of WebAssign deadlines.

• Questions about WebAssign should be directed to the WebAssign administrator, Dr. Sullivan, at shannon@mun.ca.
