

MATHEMATICS 1001 (Calculus II) — Winter 2024

WebAssign Information

An important part of your evaluation in Math 1001 will consist of a series of problem sets conducted via WebAssign, an online homework system. WebAssign gives you instant feedback on your work, enabling you to identify topics you may want to get extra help with (such as from your instructor or the Math Help Centre). WebAssign also provides various forms of additional help and practice, such as tutorial videos and supplementary exercises.

All the information you need to get started with WebAssign can be found on the Math Department's website at

<https://www.math.mun.ca/webassign/>

This includes:

- How to set up a new WebAssign account or update an existing account
- What you will need to purchase in order to use WebAssign
- How you will be graded in WebAssign
- How you can get extra practice via WebAssign

Important Notes

- When you sign up for WebAssign, you must use your @mun.ca (or @grenfell.mun.ca or @mi.mun.ca) e-mail address, in accordance with Memorial University policy. Your MUN e-mail address can be set up through <https://my.mun.ca>.
- Your WebAssign account automatically gives you access to the e-book version of the Stewart, Clegg & Watson 9th edition textbook.
- Compulsory problem sets are indicated by the symbol [!] in the title. You will also have access to a number of practice-only problem sets, indicated by the symbol [P]. These will not count towards your final grade, but you are strongly encouraged to complete them as part of your work in this course.
- Any questions about WebAssign should be directed to the WebAssign administrator, Dr. Sullivan, at shannon@mun.ca.
